May	Flower Moon 20 May / 11:59 BST	Eta Aquariids / 6 May
June	Strawberry Moon 19 June / 01:44 BST	—
July	Buck Moon 18 July / 16:45 BST	—
August	Sturgeon Moon 17 August / 08:29 BST	Perseids / 13 August
September	Harvest Moon 16 September / 00:04 BST	—
October	Hunter's Moon 15 October / 14:47 BST	Orionids / 22 October
November	Beaver Moon 14 November / 03:26 GMT	Leonids / 18 November
December	Cold Moon 13 December / 16:09 GMT	Geminids / 14 December Ursids / 23 December

How to use this sheet

Full moons are exact instants; they look full on neighbouring evenings.
Shower dates are source peak dates, not guaranteed best local observing times.
No entry means no shower from the selected eight, not an empty sky.
GMT/BST follow Europe/London. September full moon crosses into the next local date.
Moon times: NASA GSFC phase table / 2027 entries have one source.
Shower peaks: IMO 2027 Meteor Shower Calendar. See the linked online guides.
Reviewed 5 October 2026 / Maintainer: Aphelion Prints / Refresh before 2028.
